

## *Train the Trainer Course*

# Level 4 Certificate in Sustainable Buildings

It is now a clear requirement for those training others in all areas of the construction industry to have a firm grounding in sustainability and how it affects the design, construction and operation of new and existing buildings.

This Level 4 Certificate at the new SusCon centre provides a comprehensive basis for teachers and trainers who need to embed sustainability into the curriculum of what they already teach. It covers the origins of sustainability as well as current drivers, legislation and environmental assessment methods which affect all building projects in the UK.

## **COURSE CONTENT**

This is a five-day course designed specifically for those involved in delivering training who require a wide coverage of all key principles of sustainable building.

This all-encompassing certificate includes the following themes:

- Philosophies of sustainable development
- Climate Change adaptation and mitigation
- Energy in Buildings
- Sustainable Resources: Water, Biodiversity and Materials
- Waste Management
- Relevant legislation: Town Planning and Building Regulations
- Environmental Assessment Methods: Code for Sustainable Homes and BREEAM
- How to teach a variety of elements of the sustainable building curriculum.

## **COURSE DATES**

This course can be delivered as an intensive week-long course or over the period of six weeks, including a concluding examination.

Please contact SusCon to discuss your requirements.
